† The School building and two other houses have been dedicated as Wakf for the benefit of the School by Messrs. Karimji Jiwanji & Co. From the Reserved and Gifts funds, one more house has been purchased for the benefit of the School.

* The Sir Euan Smith Maddressa is the only undenominational and the oldest School in Zanzibar, having been founded in 1890. It is named after its founder Colonel Sir Charles Euan Smith the then British Agent and Consul General, to whose efforts in collecting a large amount from British Indian residents in Zanzibar the establishment owes its existence.

These monies are invested in the Bombay Municipal Bonds and the interest therefrom and monthly fees paid by the students largely go to meet its maintenance except for a small deficit which is made good from time to time by Indian subscribers. Besides Rs. 1,500 subscribed by British Indians in 1914 certain leading Indian mercantile houses have promised annual subscriptions amounting to Rs. 416 in its aid. The School is managed by a committee under the Presidency of the British Representative in Zanzibar.

Improvements in Agriculture and Manufactures introduced during the year, 1916.

Land-owners as a class are continuing to develop their properties with coconuts, the Government assisting them by supplying plants at cost price.

Progress of any Improvements previously reported.

As above indicated.

A few cases of Rinderpest were discovered during the year in cattle imported for slaughter from British East Africa. The outbreak was confined to the Quarantine Park.

East Coast fever is endemic among calves (probably the "Amakebbe" of Uganda). A few cases of trypanosomiasis in cattle have come to notice. The causal organism is *T. pecorum*. No cases of rinderpest or Surra have been reported. In 1912 there were four cases of contagious pneumonia.

A few cases of horse sickness occur every year generally after the rains, mules are also attacked. In both it is generally fatal. Among the cases in mules there was one "blue tongue" form.

Practically speaking there are no domestic pigs. The wild pig is a pest and efforts have been made to eradicate it by the introduction of swine fever.

There are no indigenous sheep. A number are imported from the Benadir Coast for slaughter.

There is a very large number of goats in both Islands. In general they are singularly free from disease, but on the Island of Tumbatu a disease occurs characterised by lesions of the hoof and the jaw.
